Instructions
CSE 300: Online 1
Section: A2

1. Reproduce the following sections of the paper attached, "**Domain Prompt Learning for Efficiently Adapting CLIP to Unseen Domains**"
2. You only need to write the following sections:
   - **Sections**:
     i. The title, authors, affiliations
     ii. Abstract
     iii. 1 Introduction
     iv. 3 Method(Including all subsections and equations 1,2,3,4) -You don't need to add other equations.
     v. 5 Conclusion(Including subsections and citations)
   - **Bibliography**: Only include the papers in the bibliography that are cited in **section 5** only. The bibliography should be numbered automatically following the style in this paper.
   - **Table**: Regenerate **the attached pdf file(Tables.pdf) including reference** and ignore other tables referred to in above sections. So, you can put the numbers in the square bracket for other tables in these sections.
   - **Figure**: Add **all figures** with captions and refer if they are in selected sections.
   - **Reference**: You need to refer to the above mentioned figures if they are referred to in above mentioned sections.

3. Make sure you correctly refer to the **equations**, **sections**/**subsections**, **figures, subfigures** and **tables and bibliography**.
4. Use the **appropriate environment** where it requires. For example, for creating a list, you should use the necessary list environment, mere copy paste won't bring any mark.
5. You may copy paste from the PDF file to save some time. But be careful to carefully format everything according to the actual presentation at the PDF file.
6. **For figures, you may take screen-shots** and then format the figures and save as per your preferred format (e.g., JPG). Then use that in Latex.
